- **44% FEMALES**
- **56% MALES**

**TOTAL +41,000**

### TOTAL RESOURCES MOBILIZED

- **$615.1 MILLION**

### TOTAL FUNDS DISBURSED

- **$286.2 MILLION**

### 18 DONORS

### TOTAL NUMBER OF MULTI-YEAR RESILIENCE PROGRAMMES

- 2017: 4
- 2018: 6
- 2019: 7

### TOTAL NUMBER OF FIRST EMERGENCY RESPONSES

- 2017: 10
- 2018: 21
- 2019: 1

---

* Children are reached through a comprehensive approach with different types of assistance that are context-specific (e.g., upgraded learning spaces, teachers trained or financially supported, learning materials, school feeding, etc.). Figures on the number of children and teachers reached are cumulative for the calendar year 2018, based on reports from ECW grants active in 2018. The total number of children reached does not include data for Yemen. Due to the highly complex nature of the crisis, about 1.3 million children in Yemen were supported to take end-of-cycle exams and received food rations. As this type of assistance is different from the assistance provided in other countries, beneficiaries are featured separately pending further aggregation of data.

** As some grantees have yet to submit fully disaggregated data on beneficiaries at country level, certain figures are estimates.

*** An additional $25.5 million has been committed but not yet disbursed.
